EDUCATION

University of the Philippines-Diliman

2022-Present

BS Computer Science, 3rd Year | Expected Graduation: 2026

Summa Cum Laude Standing (**Cumulative GWA:** 1.1360/1)

Consistent University Scholar (Semestral GWA: 1.450/1 or better)

DOST-SEI RA 7687 Scholar

Relevant Coursework:

- Data Structures and Algorithms
- Software Engineering
- Database Systems
- Computer Networks
- Operating Systems (Linux)
- Programming Languages

Philippine Science High School-Main Campus

2016-2022

With High Honors (**Cumulative GWA:** 1.500/1 or better)

Consistent Director's Lister (Quarterly GWA: 1.500/1 or better)

STEM Strand

PROJECTS

PilipiNuts 2024

[GitHub ↗](#) [Actual Website ↗](#)

2025

SvelteKit, Tailwind, Figma

Relevant Skills: Front-end Development, UI/UX Design, High-Fidelity Wireframing

- Collaborated with a team of developers and content managers to develop a website that collates promising data science projects that expose the truths, trends, and turning points in the Philippines' path to sustainable development, all aligning with the United Nations' Global Goals
- Spearheaded the design of the website, creating a high-fidelity mockup of the site in Figma
- Implemented the mockup of the website using SvelteKit and Tailwind, mainly tasked with working on the *About Us* page

Rescue Quick

[GitHub ↗](#)

2025

Django, Tailwind, Figma

Relevant Skills: Front-end Development, UI/UX Design, Internet of Things

- Collaborated with a team of developers to develop an AI-powered flood monitoring system for an Internet of Things (IoT) competition, mainly working on the front-end side

- Spearheaded the design of the web dashboard, creating a high-fidelity mockup of the site in Figma
- Implemented the dashboard using Django's template engine and Tailwind

Analyzing the Regional Budget Allocation of the Philippines

[GitHub ↗](#) [Actual Website ↗](#)

2025

HTML, CSS, Bootstrap

Relevant Skills: Front-end Development, UI/UX Design, Data Science

- Collaborated with a group of students for a data science class in analyzing the discrepancies in the regional budget allocation of the Philippines towards the 10th Sustainable Development Goal (Reduced Inequalities)
- Primarily worked on developing a portfolio website that presents the background, findings, and takeaways of the said study

Automated Planner for Efficient Scheduling

[GitHub ↗](#) [Actual Website ↗](#)

2024-2025

Python, Django, Bootstrap

Relevant Skills: Full-Stack Development, Web Scraping, Prototyping, AGILE Mindset

- Spearheaded the development of a web application that allows the students of the University of the Philippines-Diliman to curate efficient timetables given their needed classes for a semester
- Designed a high-fidelity prototype for the web application using Figma
- Collaborated with a team of developers in implementing the project using Django and Bootstrap, while engaging in five two-week sprint sessions anchored around the AGILE mindset

Bopie Studios (Personal Website)

[GitHub ↗](#) [Actual Website ↗](#)

2024-Present

React + Vite, Tailwind, Figma

Relevant Skills: Web Development, Graphic Design

- Developed a portfolio website that collates past works involving renders/image manipulation, graphic design, and programming

Bopiefy: A Spotify Stats Generator

[GitHub ↗](#)

2024

Python, Spotify API, Pillow

Relevant Skills: Python Programming, Image Manipulation

- Developed a program that generates a user's top artists and songs of all time from their provided Spotify streaming history data in JSON format
- Made use of the Pillow Python library to create the output image while making calls to the Spotify API for the details of a particular track or artist (e.g., album cover, release date, etc.)

MIPS Assembler in C

[Documentation ↗](#) [GitHub ↗](#)

2024

C Language, MIPS

Relevant Skills: C Programming, MIPS Programming

- Developed a two-pass assembler that translates lines of MIPS code into machine code, returns a symbol table, and simulates the output of the MIPS code in the terminal
- Provided in-depth documentation of the program using LaTeX

RedditSetGo: A Reddit Clone

[GitHub ↗](#)

2023

Python, Flet, FastAPI

Relevant Skills: Python Programming, API Programming, Front-end Development

- Developed a Reddit clone application in Python that allows users to view their recent feed on the platform, as well as upvote and downvote posts through API calls to the Reddit API
- Made use of Flet for the front-end side of the application

Taco: A Hangout Discord Bot

[GitHub ↗](#)

2023

Python, Discord.py, MongoDB, SQLite

Relevant Skills: Discord Bot Development

- Developed a bot configuration that aims to cater to hangout/casual servers, featuring conversation games such as “Truth or Dare”, ‘Would You Rather”, an emulation of Wordle, and a study timer

Cybot: A School Management Discord Bot

[Documentation ↗](#) [GitHub ↗](#)

2020-2022

Python, Discord.py

Relevant Skills: Discord Bot Development, Branding

- Developed a bot configuration that aims to accommodate different types of communities in Discord, focusing on academic servers in light of the then-implemented remote learning
- Designed features that ensure a smooth and intuitive user experience
- Made use of Python and SQLite in developing the bot
- Provided an in-depth guide on the bot’s functionality, as well as open-source code on GitHub

EXPERIENCE & CERTIFICATIONS

Web Development Intern

2025-Present

Natural Sciences Research Institute, UP Diliman

Django, Tailwind, Figma

Relevant Skills: Web Development, UI/UX Design

- Currently collaborating with a team of developers in revamping the website of the Natural Sciences Research Institute using a Django full-stack, Tailwind for styling, and Daisy UI for reusable user interface components

TOPCIT Level 3 Competency

[Certification ↗](#)

2024

Test Of Practical Competency in ICT

Relevant Skills: Software Development, Algorithms, Databases, Project Management

- Participated in the 11th TOPCIT Philippines performance evaluation test
- Attained a Level 3 Competency with a score above the top 10% of the takers in the Philippines
- Evaluated to be competent enough to carry out given tasks by applying basic knowledge and skills required in technical and business fields of SW/IT

Merchandise Designer

2023

Bootcamp 10.0, UP Diliman Department of Computer Science

Relevant Skills: Graphic Design, Merchandise Design

- Conceptualized a cohesive brand that captures the aesthetic of computer science students
- Developed T-shirt and Lanyard designs using Adobe Illustrator
- Coordinated with the event organizers to ensure that the visual elements used in the design aligned with the theme of the event

Opinion Co-Editor & Layout Editor

2021-2022

Ang Lagablab, Filipino Journalism Club, PSHS-MC

Relevant Skills: Collaborative Desktop Publishing, Graphic Design

- Published articles in Manila Today containing critiques tackling the persisting beauty standards in Filipino media, the then-upcoming 2022 National Elections, and vaccine hesitancy among Filipinos
- Produced promotional materials for the annual celebration of “Buwan ng Wika” at the Philippine Science High School-Main Campus
- Published a newspaper issue for the school year, participating in both written (Opinion) and layout components

Build Wireframes and Prototypes [Online Course]

[Certification](#) ↗

2021

Google UX Design Certificate Program, Coursera

Relevant Skills: UI/UX Design

- Learned about the basic principles and foundations of user experience design, effective user interaction flow in mobile applications, and designing low-fidelity wireframes and prototypes
- Developed low-fidelity wireframes and an application prototype for “Soba”, a fictional Japanese restaurant, as the course’s capstone project

SKILLS & INTERESTS

Programming Languages

Python | C | HTML/CSS | JavaScript | SQL

Software

Microsoft Office | Google Suite | LaTeX

Graphic Design

Adobe Creative Suite | Canva | Figma

Frameworks & Technologies

Git | Django | SvelteKit | React | Tailwind | Bootstrap
